## PRECAUTIONS (Please Read Carefully)

**The treatment** you will receive is a clinical treatment designed to exfoliate or remove the outer layers of the skin.  
**Your participation** in your skincare treatments will determine the outcome. It is important that you strictly adhere to your home care products that your aesthetician has recommended.  
**No guarantee** is expressed or implied as to the precise results, peeling times or discomfort.  
**During the treatment**, you may experience some temporary stinging or warm flushing. This will fade within a few minutes. During the next few hours, you may experience some tightening of the skin, which may last for several days.  
**For most patients**, flaking begins within 48 hours. It is impossible to pre-determine how much peeling will occur. The shedding process usually subsides within 5-7 days.  
**Depending on the clinical peel** performed and your skin quality, the following reactions may occur in some patients:  
1) Prolonged redness, irritation and flakiness 2) Dryness and sensitivity 3) Severe allergic reactions in rare instances
